Work Experience

ClassLink

Software Developer

May 2021 to Present

- Developed and designed software and web applications hosted on ECS and built through Jenkins and AWS pipelines, supporting almost 2000 school districts through the use of various technologies, including but not limited to C# .NET, Node.js, TypeScript, Angular, and React.
- Cut OneSync import time for districts with 50,000+ users from roughly 40 minutes to 2-3 minutes through layered optimization: a source-wide condition cache reused across imports, skipping collections whose dependencies had not changed, and rebuilding only the users who moved.
- Built a multi-agent orchestration system that turns a Linear ticket into a planned dependency graph, dispatches agents in parallel git worktrees in waves, and gates every change with automated agent code review and tiered tests.
- Developed OneSync destination exports that sync district users into Active Directory, Google, and Azure/Entra, delivered through CI/CD pipelines.
- Followed professional Agile Scrum processes and was heavily involved in sprint ceremonies, going from heavy architectural planning presenting to client facing presentations.

Yanco International Inc.

Lead Software Developer (Contract)

Jan. 2023 to June 2025

- Managed the company's main website and upgraded the overall security, speed, and ease of use. This ranged from simple bug fixes and refactors to a full migration from Bluehost to AWS.
- Built a mobile application to automate warehouse workflow, utilizing Flutter and C# endpoints, allowing physical warehouse actions to directly apply to the database and replacing the paper forms workers had been printing and filling in by hand.
- Built EDI (Electronic Data Interchange) workflows in C# that let the company exchange data automatically with multiple customer systems.

TWG Companies

Software Engineer Intern Team Lead

June 2020 to Sept. 2020

- Performed team lead responsibilities: Assigned and planned out team agendas, Organized and integrated group code, Attended meetings as the representative of the Bitrix24 team to report and collaborate with other team leads

Rutgers New Brunswick IT Services

IT Services Technician

June 2017 to Oct. 2020

- Provided IT Support to various departments, supporting Windows, Mac and mobile devices. Deployed images and scripts to company owned machines while managing their ports and servers to maintain security.

Skills

CS LANGUAGES: C#, TypeScript, JavaScript, Python, SQL, T-SQL, Java, C, Bash, HTML, Dart, R, MATLAB, PHP, Haskell, Prolog, Assembly

PROGRAMS/PLATFORMS: AWS, Azure, Docker, ECS, Jenkins, CI/CD, GitHub Actions, Git, GitHub, .NET, ASP.NET Core, React, Angular, Node.js, Django, Flutter, REST APIs, Microservices, SQL Server, MySQL, PyTorch, OpenCV, Active Directory, Entra, SCIM, Postman, Jira

AGENTIC SKILLS: Claude, Codex, Claude Code skills, Multi-agent orchestration, Headless agent fleets, Git worktree isolation, Model routing for cost control, MCP servers, Automated multi-lens code review, Agent quality gates, Linear, GitHub pull request automation, Google Gemini

Projects

Pengin: Course Management System

May 2026

A course management system that focuses on the three dimensions of engagement through the use of teacher-controlled toggles. They affect how the students interact with lectures and assignments through check-ins, explanations, etc. It uses Google Gemini as the core AI and additional tooling exists to analyze student engagement levels.

Natural Language Processing: Key-Value Memory Network

Nov. 2025

A key-value memory network agent that can answer questions. It was trained over a Wikipedia knowledge base via bag-of-words encoding, softmax attention over keys and negative sampling. It used a train/test evaluation loop that converged on synthetic evaluation before scaling to the full corpus.

Education

Georgia Institute of Technology Atlanta, GA

May 2026

Master of Science in Computer Science, Specialization in Artificial Intelligence

Rutgers University New Brunswick, NJ

May 2021

Bachelor of Science in Computer Science • Bachelor of Science in Finance

Certifications

NVIDIA AI Certifications

Jul. 2025

Fundamentals of Deep Learning, Generative AI with Diffusion Models, Data Parallelism: How to Train Deep Learning Models on Multiple GPUs, Applications of AI for Anomaly Detection, Building AI-Based Cybersecurity Pipelines

University of Alberta Certifications

Mar. 2025

Design Patterns, Service-Oriented Architecture

Scrum.org · PROFESSIONAL SCRUM DEVELOPER CERTIFICATION

Nov. 2021
